Dear Mr. Dovi,

My husband and I have a small but growing print shop in Dallas, TX. We have become a favorite GO TO for our clients because we are crazy about quality, quick turn times and customer service that doesn't know the word "NO". Since we are so crazy, we wanted to be able to say YES when clients needed labels. We do Crack & Peel & Pre Kiss cut labels all day long, but there are many applications that a Roll would be better. We also get requests for "die cut" shapes which is not easy to do with scissors. But we are crazy, and scissors are sometimes what we have done.

NOT NOW! – We put a UniNet System on our floor. Now our clients don't just get cards, flyers, banners same day next day, now they can have die cut labels. We can put them on Vinyl, Polyester, Gloss Paper, Uncoated Paper, Clear Vinyl and more. The system starting earning its keep day one. Great little system. Great support.

But if you are in Dallas, you just want to call me.

Yours Truly,

Brenda
