iColor[®] Label Matrix Remover & Slitter System

OUR MOST
OUTSTANDING
SOLUTION FOR LABEL
PRODUCTION!

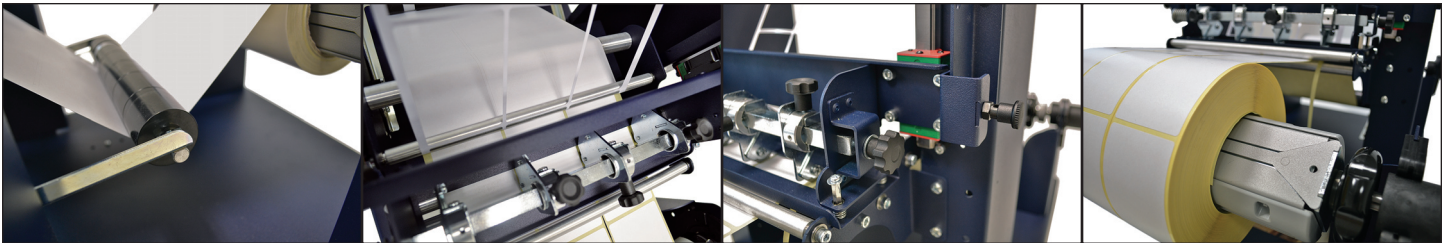

iColor® Label Matrix Remover & Slitter System

The **iColor® Label Matrix Remover and Slitter System** is an integrated solution designed to respond to today's changing production requirements. It delivers fast, efficient and lower cost label production thanks to featured functionalities such as unwinding, label matrix removal from die-cut label rolls, slitting, and rewinding onto powered 3" core holders... all done with ease and precision.

The Matrix removal and slitting operations are performed simultaneously; the matrix removal detaches waste label matrix from printed die-cut label rolls, while the slitter system performs several tasks at once: label roll unwinding, slitting and rewinding onto a 3" core holder with impressive cleanliness and accuracy.

The system also offers the flexibility to be used as only a label matrix remover or as a slitting system for specific jobs, which serves to accommodate more applications and job types.

The **iColor® Label Matrix Remover and Slitter System** is a solution explicitly designed to remove the matrix while slitting and rewinding labels to finished rolls.

iColor® Longitudinal Label Slitter

The **iColor® Longitudinal Label Slitter** was designed to satisfy market's current demand to make the most of the print area with the added functionality of achieving more rows of labels from the same roll, and splitting them through the use of the slitter.

The cutting operations are done by a common cutter blade located in an opposite blade holder. The slitter has an external auto-switching 100/240V power supply, and an electronic circuit controls all its functions.

The new slitter, equipped with two 3" fixed core holder is able to work rolls with a diameter of 9.84" or 11.81." The maximum width of the roll is 8.66" and it is possible to obtain rows of labels not narrower than 0.86."

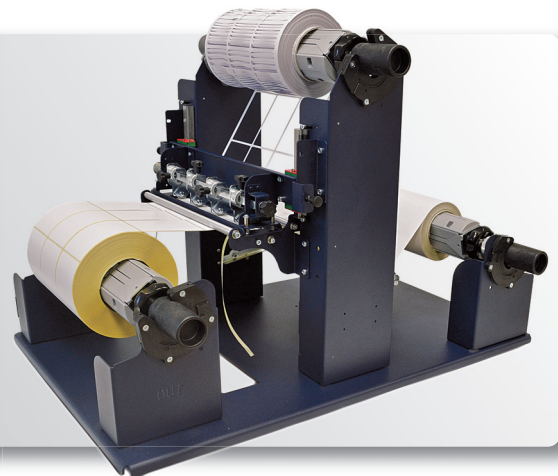

Using the slitter "on-line" with your label printer is now possible by utilizing the connector included with the equipment.

iColor® Label Matrix Remover & Slitter System Specifications

POWER	100/240VAC - 2.5A at 24V power supply
DIMENSIONS (HxWxD)	25.59" x 35.43" x 19.68"
MAX. OUTSIDE ROLL DIAMETER	9.84"
MAX. LABEL WIDTH	8.66"
MIN. SLITTING WIDTH	0.98"

ADDITIONAL FEATURES

- Manual speed adjustment
- Label rewinding face-out only
- Includes four blades and 3" fixed core holders
