

UniNet to Demonstrate Label & Packaging Solutions at West Pack 2018

January 2018 – Hawthorne, CA. USA

UniNet, worldwide Original Equipment Manufacturer (OEM) of on-demand digital print technology, will be demonstrating label printing, finishing and packaging solutions at West Pack 2018. During the three-day event, the team will highlight various product solutions for commercial printers, as well as small to medium sized business owners looking to reduce their outsourcing costs by creating their own labels, packaging and transfer products in-house.

"The print market is continually changing, and customers are requiring faster turnaround times, smaller quantities, lower costs and the ability for customization. iColor Printing Solutions strives to meet those demands by offering complete workflow solutions - whether creating food labels, prototypes of packaging, promotional brochures or shirts for a little league team," said Joe Dovi, COO of UniNet.

Taking place Feb. 6-8th in Anaheim, CA., you can visit UniNet in booth #5485 to see demonstrations of iColor® Printing Solutions, including digital label and transfer printers, label finishing systems for rolls and sheets, specialty toners, substrates and more.
