

## **UniNet to Show iColor Printing Solutions at the Imprinted Sportswear Show (ISS)**

*January 2017 – Hawthorne, CA. USA*

UniNet will be exhibiting at the 2017 ISS Expo in Long Beach, CA on January 20<sup>th</sup>-22<sup>nd</sup> to showcase iColor Printing Solutions. Located in booth #144, UniNet will be demonstrating the iColor® 600 and 500 for the graphics, apparel and textile transfer markets.

The UniNet iColor® 600 and 500 transfer printers are the most innovative toner-based digital printing technologies for short to mid run production of apparel, garments, cards, stationary, invitations, envelopes, labels, brochures, and more. These printers feature full color, white and optional fluorescent toner colors that can be combined to create stunning transfer media output. The iColor® 500 and 600 are the only printers on the market to feature white underprint and overprint capabilities, a groundbreaking new technology that enhances the vibrancy of text and graphics when printing on clear and dark media.

"We will be offering a game-changing technology to the graphics, apparel and textile transfer markets with the most affordable toner-based, heat-transfer solution for full-color, fluorescent color and white printing on the market. Our iColor® 600 and 500 Digital Printers are an ideal complement to the graphic arts and textile transfer industries" said Joe Dovi, COO at UniNet.

Visit Booth #144 at ISS to see demonstrations of the UniNet's iColor® Printing Solutions. For additional information on these products and more, please email [sales@icolorprint.com](mailto:sales@icolorprint.com) or visit [www.icolorprint.com](http://www.icolorprint.com)
